Detailed Action

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 2, drawn to a solution comprising essential oil of thyme, classified in class 424, subclass 774, for example.
- II. Claims 3-10, drawn to a process of dispersing aerosol to eradicate mold, classified in class 504, subclass 123, for example.

The inventions are distinct, each from the other because:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case Group I is drawn to a solution comprising essential oil of thyme and Group II is drawn to a process of dispersing the solution to eradicate mold.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
